---

## SUMMARY

An Industrial Statistics graduate with strong analytical and problem-solving abilities and practical experience in data analysis, software development, testing, and technical troubleshooting. Skilled in SPSS, Excel, SAS, SQL, Python, C#, and VB.NET. Seeking a full-time position to apply my analytical and technical skills while continuing to develop through practical experience and continuous learning. Available to start from late November or early December 2026.

---

## WORKING EXPERIENCE

### Software Engineer Intern - Coherent Ipoh

Apr 2026 - Sep 2026

- Developed and enhanced applications using C#, VB.NET, Python and SQL to support file processing, automation and data-related workflows.
- Investigated and resolved software, file-access and configuration issues through systematic troubleshooting, testing and validation.
- Supported tester systems through configuration, hardware/software setup, functional testing and technical troubleshooting.
- Analysed tester data and test results using Excel and graphical analysis to identify performance trends and potential issues.
- Collaborated with supervisors and senior engineers while independently learning new technologies and validating AI-assisted code against project requirements.

### Part Time Casino Croupier - Genting Malaysia Berhad

2023 - 2025

- Delivered professional, efficient, and friendly dealer services to ensure smooth gaming operations.
- Assisted customers by addressing inquiries, clarifying game rules, and resolving conflicts calmly and professionally.

### Assembly Line Operator - PCO Lite Electrical Sdn.Bhd

2022

- Followed supervisor guidance to carry out various assembly tasks across multiple stages of production.
- Supported team productivity by assisting colleagues with their tasks after finishing my own assignments.

---

## ACADEMIC PROJECTS

### Final Year Project: Comparative Classification Analysis for Predicting Aggressive Behaviour Among High School Students

- Analysed 20,103 student records from the 2023 Youth Risk Behavior Surveillance System (YRBSS) dataset to predict physical fighting behaviour.
- Developed and compared three classification models: Linear Discriminant Analysis (LDA), Logistic Regression, and Random Forest using Python.
- Evaluated model performance using accuracy, precision, recall, and F1-score, achieving a maximum accuracy of **92.91%**.
- Identified LDA as the most suitable model for detecting students involved in physical school fights based on minority-class recall and F1-score.

### Car Price Prediction

- Conducted a multiple linear regression analysis using SPSS, applying ANOVA to assess overall model significance and t-tests to identify significant predictors, and used Excel to visualize model assumptions.

### Forecast Malaysia's Total Import Quantity

- Learned quantity forecasting methods including Double Exponential Smoothing, Time Series Regression, Holt-Winters, ARIMA, and others. Applied these methods in SPSS and Excel and identified the most suitable model by comparing forecasting errors.

### Investigating Battery Consumption Across Phone Models

- Performed ANOVA and Tukey post-hoc tests in SAS using PROC GLM, followed by residual diagnostics (Q-Q plot, normality test, residuals-fitted plot) to validate model assumptions.

---

## EDUCATION

---

### Bachelor's Degree of Science with Honour (Industrial Statistics)

2022 - Present

Universiti Utara Malaysia (UUM)

- Current CGPA: 3.84
- **Relevant Coursework:** Data Exploratory and Generalisation, Sampling Technique, Probability and Statistics, Inferential Statistics, Regression Modelling, Statistical Quality Improvement, Design and Analysis of Experiment, Multivariate Analysis, Decision Modelling, Forecasting Methods, Official Statistics

### Sijil Tinggi Pelajaran Malaysia (STPM)

2020 - 2022

SMK Seri Kampar

- CGPA: 2.92
- MUET: Band 4

---

## KEY ACHIEVEMENTS

---

### Dean's List Achievement

Achieved Dean's List from Semester 1 to Semester 5

---

## LANGUAGES

---

Mandarin (Native) | Cantonese (Native) |  
English (Intermediate) | Malay (Intermediate) |

---

## SOFTWARE SKILLS

---

Microsoft Word | Microsoft Excel |  
Microsoft Power BI | IBM SPSS Statistics |  
Visual Studio | PowerPoint | Canva |  
Python | SQL | Google Colab |

---

## EXTRACURRICULAR ACTIVITIES

---

Treasurer of the Incentive Camp 2025, organized by Club Yipianwa

Committee Member for the Incentive Camp 2023 and 2024, organized by Club Yipianwa

Head of the Cultural Department for the Cultural Festival and Event Night 2023, organized by HIHUTM
